

Stay at home

  
I have to stay home and away from crowded places

 
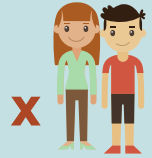

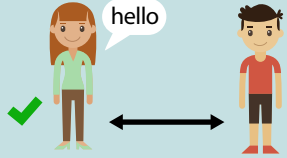

My favourite places are not open

  
People are getting each other sick by spreading germs

   
We have to stay home and wash hands often to stay well

   
I need to cough or sneeze into a tissue or my elbow to not spread germs

   
I can still go outside, go for walks and enjoy the sunshine with the people I live with

 
I cannot be close to other people, but I can still talk to them

  
I can stay in contact with people who don't live with me on the phone

   
The better we are at staying home, the sooner places will open again

    
When it is safe, the places I like to go will open again and things will go back to normal
